

Large Black Hog Association Ear Notching Chart

Notch sizes exaggerated
for effect.

Locations are approximate.

Instructions

Use any combination of the notches shown above to make any number up to 161.

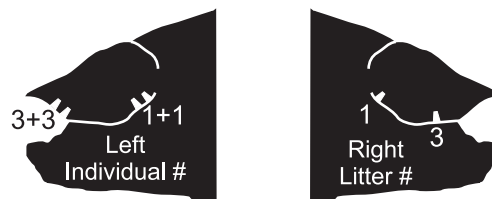

- The **Left Ear** represents the **Individual pig** number.
- The **Right Ear** represents the **Litter Number** for your farm (start at 1).
 - Make a notch about 1/4" deep.
- Use a quality notching tool (A stainless steel tool is better)

For example: Your first litter will be 1, so make a notch in the '1' position on the right ear. The first piglet you pick up will have a '1' notch in the left ear, the second will have 2 '1' notches making it #2. The third piglet will have 1 notch in the '3' position, the fourth 1 notch in the '3' position and 1 in the '1' position, etc.

Example 1
Litter 1, Pig 1
(1/1)

Example 2
Litter 4, Pig 8
(4/8)
